DIGITAL SKILLS

JavaScript (ES6+), React, HTML5, CSS3, DOM manipulation, Git basics, browser developer tools, localStorage implementation, problem solving, and basic web application design. Familiar with creating interactive UI components and handling user input dynamically.

SUMMARY

I am a Computer Science student with hands-on training in front-end development, where I have built practical projects to strengthen my programming and problem-solving skills. Through working with technologies such as JavaScript and React, I have gained experience creating interactive user interfaces and implementing features like dynamic components, state management, and local storage functionality. My learning process focuses on applying concepts through real projects, debugging challenges, and continuously improving my understanding of modern web development practices.

EDUCATION & TRAINING

2025-03 - 2029-07

B.Sc computer science , Computer Sccientist
Addis Ababa University

PERSONAL SKILLS

Communication Skills

I communicate technical ideas clearly through collaboration and project-based learning in front-end development. I actively engage in problem-solving discussions, ask constructive questions, and share solutions while debugging and building applications. I am comfortable learning from feedback and working cooperatively in team environments.

Organisational/Managerial Skills

I manage development tasks by breaking projects into smaller components and completing them step-by-step. Through building multiple coding projects, I have developed strong time management, attention to detail, and the ability to prioritise features and debugging efficiently. I maintain organised code structure and follow logical workflows during development.

Job-related Skills

Front-end web development using HTML, CSS, JavaScript, and React. Experience building interactive applications such as shopping carts, notes apps, and dynamic user interfaces with state management and local storage. Strong debugging skills and understanding of responsive design and user experience principles.
